Details of the Information Day

Location: European Medicines Agency
Canary Wharf
7 Westferry Circus
London E14 4HB, UK

Capacity: The event is limited to 120 participants

Overview

In November 2012, step 4 of the ICH E2B (R3) package has been signed off based on the ISO ICSR standard including the awaited implementation guide (IG) accompanied by several technical appendices. This step opened the way for the worldwide implementation of the ISO ICSR standard replacing progressively the current E2B (R2) version. The first package (version 1.01) was made available on 12 April 2013 to the users in order to begin the testing phase and the implementation of data exchange between partners.

In the context of the EU implementation, a regional IG is being prepared addressing EU specific requirements in relation to the application of the ISO ICSR standard and the E2B (R3) package.

This Information Day will address and explain the key changes expected in relation to the application of the new ISO ICSR standard and how those will impact the EU adverse reaction reporting and electronic transmission activities.

Key Topics

- Key differences between the ISO ICSR International Standard and the current ICH E2B(R2)guideline
- The ICH safety message flow in the EU
- Processing of safety and acknowledgement messages in case of technical or system failures
- EU specific business rules and technical ICSR validation
- Case classification
- ICSR specific concepts and their application in the EU (e.g. amendment report, causality assessment)
- Coding of medicinal product information
- Use of MedDRA in the context of the new ICSR reporting
- Handling of attachments
- EMA testing procedures with stakeholders

Learning Objectives

At the conclusion of this course, participants should be able to:

- Recognise the new requirements as regards the ICH E2B (R3) and EU region specific implementation
- Prepare for the implementation of the new ICSR standard and the adaptation of internal pharmacovigilance systems by all stakeholders involved (medicines regulatory authorities in the EU, IT vendors and pharmaceutical companies)
- Understand the use of the new ICSR format in line with EU pharmacovigilance legislation

Who Will Attend

- Representatives of IT departments of medicines regulatory authorities, pharmaceutical companies and service providers
- EU Qualified Persons Responsible for Pharmacovigilance (EU QPPVs)
- Pharmacovigilance staff of pharmaceutical companies and medicines regulatory authorities
- Pharmacovigilance software vendors
- Sponsors of Clinical Trials
