Nick Juleff, Senior Program Officer

Conference Overview

The 5th in the series of Global Animal Health Conferences is organised with the support of the Organising Committee partners and funded by the Bill & Melinda Gates Foundation (BMGF). The conference is scheduled to take place on 17 November 2016 in New Delhi, India. Government representatives, regulators, senior animal health experts, industry, academia, inter-governmental bodies and international organisations will exchange views on the importance of good regulatory governance of veterinary medicines. Sound governance and alignment to international standards promotes improved animal health that in turn contributes to socio-economic development. The focus will be on India and South Asia and the need for appropriate regulatory systems to enable the registration, market access and market control of quality assured animal health products, and the contribution this makes to the 'One Health' vision.

Conference Aims

To increase political and stakeholder awareness and support for better animal health and better access to quality assured animal health products.

To increase the understanding of the needs of different stakeholders and regulators in the region with regard to regulatory harmonisation.

Conference Objectives

- Identify challenges relating to the registration process and improved market access for authorised veterinary medicines and how to promote the implementation of suitable systems.
- Explore the importance and benefits of regulatory convergence, including alignment to international standards and guidelines, and identify the key parameters enabling countries to implement them.
- Identify the needs, responsibilities and challenges relating to control of product quality during manufacture and control of products throughout the distribution chain.
- Through case studies, explore the needs for capacity building, mutual recognition and regional organisations in the efficient implementation of regulatory systems.

Conference Fees, Travel, Accommodation and Living

- There is no registration fee, conference fee or workshop fee.
- There is no fee for the pre-conference dinner, the conference lunch and coffee breaks.
- Visa applications, travel and accommodation for academia, government and government agency employees will be covered by the conference funder. We kindly ask industry attendees to bear the costs of their travel and accommodation arrangements.

Registering

If you are interested in attending the Pre-Conference Workshop or the Global Animal Health Conference 2016, please complete your application online:

<http://gahc.diaonline.events/>

We only have a limited number of places available. Please note that your registration is not valid until you have received a confirmation email by DIA.

Visa Application: Apply at your earliest convenience

You are required to possess a valid international travel document in the form of a national passport with a valid visa. We encourage you to contact the Indian embassy in your respective country for further details and to apply for your visa as soon as possible. We strongly recommend that you follow their requirements due to strict application laws. We will be happy to provide an invitation letter to all attendees whenever needed, so please don't hesitate to ask.

Practical Assistance

The conference organisers will provide practical assistance with travel and accommodation for academia, government and government agency employees, this includes:

- Reserving hotel rooms according to your needs
- Reserving flights via an on-line booking tool
- Arranging transfers between the airport and the hotel
- Providing an invitation letter if needed

Vaccination

Please check the recommended vaccinations and medications with your doctor (ideally, 4-6 weeks) before your trip.

Special thanks to our sponsors.

For any further information please contact Carolin Dörflinger from DIA at the following address:
