ADIS PHARMACOVIGILANCE - THE EXPERT SOLUTION FOR REGULATORY LITERATURE MONITORING

With more than 30 years' experience of delivering pharmacovigilance content and solutions, Adis is the unrivalled industry leader. More than 6,000 customers globally purchase drug safety information and pharmacovigilance solutions from Adis.

By outsourcing some of your pharmacovigilance work to us, you can free up your internal resources and have peace of mind that you are securing a reliable and cost-effective service for your organization.

Our literature monitoring services include:

- ICSR monitoring
- special situation ICSRs
- ongoing safety monitoring
- signal monitoring
- local literature monitoring
- customized source coverage
- periodic safety update reports and annual reports

Together we will review your current processes and determine how we can best support you. We work with your team throughout the whole process, from designing the right solution to helping you prepare for audits. We understand that your business needs can change during the course of the year, as can regulatory requirements, so we meet with you on a regular basis to ensure that we are always delivering the best possible service to your organization.

If you are ready to take the first step and would like to explore the possibility of working in partnership with Adis Pharmacovigilance, please get in touch.

Your partner in regulatory literature monitoring

Our literature monitoring services include:

Regulatory literature monitoring puts many pressures on your pharmacovigilance department – from the time and specific expertise required, to constantly battling to meet deadlines.

Adis Pharmacovigilance are experts in structured literature monitoring and assessment. By working in partnership with us, you can free up your time and have peace of mind that your processes will continue to run smoothly.

"It would be difficult for us to replicate the expertise and automation that an external vendor such as Adis can offer. The beauty of working with them is that we no longer have to worry about literature monitoring as this part of our pharmacovigilance process is taken care of. We can present our workflows during inspections and audits and be confident that we are complying with regulations".

A testimonial from one of our existing customers.

Take the first step towards a better way of working and get in touch. Email pharmacovigilance@adis.com or visit adis.com/pharmacovigilance for further details.

IBM Watson Health™

IBM Watson Health – Empowering PV professionals, Transforming Pharmacovigilance

IBM Watson Health aspires to improve lives and give hope by delivering innovation, through data and cognitive insights, to address the world's most pressing health challenges.

Watson for Patient Safety is a cognitive end-to-end SaaS based solution designed to help PV professionals discover relevant safety information and make decisions.

- **Consistency** - Watson for Patient Safety can offer consistency in case evaluation and intake.
- **Confidence** - Safety issues may be detected earlier by applying predictive analytics to detect early trends.
- **Speed** - Accelerate and scale intake workflows with cloud and cognitive technologies

The graphic features a teal background on the left with a white icon of a person and a heart. The text 'Watson for Patient Safety' is prominently displayed in white. On the right, a photograph shows a woman kissing a baby on the cheek. A dark teal button with white text is positioned at the bottom right of the image.

| Innovative Pharmacovigilance Analytics and Intelligence

innovPV is an innovative post-market drug safety analytic tool that generates drug safety intelligence proactively and strategically with advanced data analytics, signal detection algorithms, and cutting-edge data visualizations of data mining outputs from spontaneous data sources and literature.

Facilitating Risk Benefit Analysis

Datamining adverse events reported in spontaneous data sources and MEDLINE side by side to gain insights into drugs' safety information

Strategizing Drug Safety Management

Utilizing statistical datamining techniques to quantify all possible drug-event combinations and drug-drug-interactions and visualize through interactive graphs for rapid analysis

Safety Signal Management

End to end tracking and managing signals, providing audit trail and receive alert notifications when data is refreshed or updated

Literature

Literature articles can be investigated as overall events associated with the selected product.
