CONFERENCE HIGHLIGHTS

This two-day conference will explore the skills, processes, and tools necessary to achieve project management success at your organization. Leaders in their fields will present top-notch lectures and facilitate lively discussions on how they have been successful in their organization and where they have observed successful leadership in other settings. And don't forget your business cards, because this conference will provide extensive networking opportunities to help you grow your network of project management colleagues from whom you can learn for a lifetime.

PRE-CONFERENCE TUTORIALS WILL BE HELD ON OCTOBER 22

TUTORIAL #1

**PROJECT MANAGEMENT IN LIFE SCIENCES: HOW WELL IS IT REALLY DONE?
RESEARCH OUTPUTS FROM A GLOBAL STUDY**

TUTORIAL #2

IMPLEMENTING CRITICAL CHAIN IN THE PHARMACEUTICAL AND MEDICAL DEVICE INDUSTRY

See Page 2 for more tutorial details.

WHO SHOULD ATTEND

Professionals interested in life sciences project management, including:

- ▶ Pharma, biotech and medical device program and project managers
- ▶ Global product/project leaders
- ▶ Drug development functional leaders
- ▶ Discovery and development portfolio managers and planning staff

TUTORIAL #1

PROJECT MANAGEMENT IN LIFE SCIENCES: HOW WELL IS IT REALLY DONE? RESEARCH OUTPUTS FROM A GLOBAL STUDY

INSTRUCTOR

Pete Harpum, MSc, MAPM

Director, Harpum Consulting

Ever wondered how well pharma, biotech, and device companies actually do project management? Have you heard rumors that there is a lot of ground for life science project management to catch up on compared to other sectors? This tutorial will present the outputs from a global research project on the best practices found in drug and device project management. We will show you how well project management can be done in this sector. Not only that, we will give you clues about how to begin convincing senior management of the huge contribution effective project management can bring to your organizations. There are people out there using project management to fix the oft-stated 'broken pharma model.' We will bring you the lessons to take back to your own workplace.

LEARNING OBJECTIVES:

- Obtain a data-driven perspective of the best practices in life science project management
- Recognize the leverage these best practices provide to the companies using them
- Reflect on ways in which your own organization can adopt the practices identified

1:30-5:00 PM

TUTORIAL #2

IMPLEMENTING CRITICAL CHAIN IN THE PHARMACEUTICAL AND MEDICAL DEVICE INDUSTRY

INSTRUCTOR

Jason C. Bork

Manager, Project Management Excellence
Eli Lilly and Company

The tutorial will be given by multiple presenters. Here are the key segments. Introductions by Jason Bork from Eli Lilly.

1. Why senior executives should care about Critical Chain (30 min)
Andreas Scherer
2. Key concepts and implementation strategy (90 min)
Wendell Simpson
3. Customer examples in the Pharma and Medical Device Industry (60 min) (Sharon Miller, (Lilly) Chuck Voelker (Abbott)
4. Q&A session with the presenters (30 min) All

LEARNING OBJECTIVES:

- Understanding the business impact of Critical Chain in the Pharma and Medical Device Industry
- Becoming familiar with key concepts and terminology
- Understanding real world applications of Critical Chain in the Pharma and Medical Device Industry

Please note that lunch is not served on the tutorial day.

PLENARY SESSION 1

**ART OF STRATEGIC PLANNING VS. SCIENCE OF
OPERATIONAL EXCELLENCE**

SESSION CHAIRPERSONS

Randy Dunson, MBA, PMP

Senior Consultant, Harpum Consulting Ltd., U.S. Operations

Martine van Vugt, PhD

Associate Director, Genmab BV, Netherlands

Strategic planning is an organization's process of defining its strategy, or direction, and making decisions on allocating its resources to pursue this strategy, including its capital and people. Operational excellence is a goal of conducting business in a manner that improves quality, obtains higher yields, faster throughput, and less waste, and also the state or condition of superiority in operations and execution of business processes. There are varying opinions that view strategic planning is an "art" and operational excellence is a "science." This session seeks to delve into the issues surrounding these opinions to offer thoughts on how both processes might influence pharmaceutical project management today and in the future.

**METRICS AND REGULATORY IMPACT:
CAN WE TAKE THE MEASURE OF THE FUTURE?**

SESSION CHAIRPERSON

Wolf-Ulrich Nickel, PhD

Executive Director, Global Project Leader, Celgene Inc.

The session will be a keynote lecture for the entire audience. Based on recent studies of metrics such as cost, clinical development and approval times, as well as success rates will be presented to demonstrate shifts in the health care and pharmaceutical industry. The impact of these metrics will be discussed for the future planning with a strong emphasis on regulatory influence for new projects and portfolio planning strategies.

PLENARY SESSION 3

**EVOLVING THE ROLE OF PROJECT MANAGEMENT:
STRATEGIES FOR GETTING A SEAT AT THE EXECUTIVE TABLE**

SESSION CHAIRPERSON

Su Linna, MS, MA

Executive Director, Project Management, Novavax

Project Management is recognized as an "art and a science", it's an operational as well as a strategic role, and it's managing day-to-day detail while never losing sight of the big picture. With this broad range of responsibilities and high expectations placed on project management to deliver operational success, what are the attributes of an accomplished project manager and how does the function get a seat at the executive table? In this plenary session, two models of project management/project leadership will be compared and contrasted. Join this session to learn how organizations view the roles of project leaders versus project managers, what are the most valued skills, how organizational structures can reinforce a project management function, and what are the career ladders and opportunities for growth.

SESSION CHAIRPERSONS (US AND EUROPE)

Eric M. Towler, PhD, PMP

Associate Project Director, Project Management, Merck & Co., Inc.

Elisabeth C. Goodman, MSc

Business Operations Consultant, GlaxoSmithKline Research & Development Ltd, UK

The purpose of this session will be to address the hard tools, the "Science of Project Management", necessary to achieve project management success and increase productivity in our organizations. During the course of the session, attendees will hear a broad overview of tools to be considered, as well as specific practical examples of how some of the tools are being applied. Attendees will learn best practices from leaders in the Science of Project Management.

SESSION CHAIRPERSONS (US AND EUROPE)

Kristin M. Neff, MS

Director, Clinical Project Management Office, Boston Scientific Corp.

Ralph D. White, PhD

Director, PPMLD Ltd., UK

While matrix management is fairly common in the pharmaceutical industry, upon closer inspection, different organizations implement a matrix structure in different ways to support their needs. This session will look closely at the matrix environment to better understand the unique challenges associated with effectively executing a matrix management structure in an organization, as well as the opportunities for ensuring Project Management excellence in a matrix environment. Case studies will be presented to support greater understanding of matrix environments in our industry.

CHANGE MANAGEMENT

SESSION CHAIRPERSONS (US AND EUROPE)

Jann Nielsen, PhD

Senior Director, Project Management, Wyeth Research

Pete Harpum, MSc, MAPM

Director, Harpum Consulting

The DIA Annual Project Management Conference always seeks to present thinking from experts on best practices in project management. Our speakers passionately believe that project management is an essential element of business management, not an adjunct to it. Bringing about the change within organizations that is required to allow best project management practices to flourish is however a difficult, not to say daunting, task for senior managers and practitioners alike. The speakers will tell you their stories of organizational transformation and employee change, as they brought stronger project

management cultures to their organizations. Their experiences, working from both US and EU locations, will provide invaluable insights for people contemplating, or in the middle of, challenging programs of change to develop project management as a core competence of their company. Following their presentations, delegates will have the opportunity to interact with the presenters in a global Q&A session.

PROJECT MANAGEMENT LEADERSHIP: FUNCTIONAL PMs VERSUS GLOBAL PMs

SESSION CHAIRPERSONS (US AND EUROPE)

Majda Benhayoun, PhD

Director, Program & Portfolio Management, Vertex Pharmaceuticals, Inc.

John A. Faulkes, MSc, MCIPD

Consultant, TeamCommunications Development, UK

This session will discuss leadership skills of Functional PMs versus Global PMs. Functional PMs include Clinical, CMC or data management PMs. They are responsible for planning and executing their project, they may also form and lead teams. They coordinate all the activities and ensure that the projects are executed on time and on budget. These responsibilities need strong skills that help manage projects but mostly people, where the PM motivates and empowers the team to achieve the project goals. The drug development PMs are the so-called Global PMs. In many Life Science organizations, they work in partnership with Project Leaders. They are responsible for managing the projects including planning without directly executing the plans, do they need to have different skills to achieve the development project goals?

Are the leadership skills, approaches and personal styles required for these roles all different? We will discuss.

Over the past five to seven years the Pharma R&D Business model has evolved, with this evolution the role of Project Management changes. As many organizations are modifying their R&D systems to produce a more integrated model, other organizations are seeking new ways to extract the maximum value from this integration. To this end, we will explore leading edge methods and practices related to driving performance through the use of metrics and how to translate the theory into practical application.

This session will be designed to be thought provoking and interactive while focused on exploring real-life examples and practices from industry leading speakers that the audience can take back to their respective companies for consideration and implementation.
