

WHAT DO YOU WANT TO LEARN AT DIA'S CID CONFERENCE?

- How does the Complex Innovative Trial Design (CID) Pilot Program enable the exploration of the innovative use of alternative data sources?
- What innovative designs has FDA accepted into the CID Pilot Program and how is the program progressing?
- What are the essential elements of master protocols and how can you apply new approaches and trends in your designs?
- How can complex adaptive designs, when appropriately designed and implemented, significantly improve the efficiency and cost-effectiveness of trials?
- How can we use digital applications to identify, screen, enroll, collect data, and provide an intervention to patients?

GET ANSWERS IN MARCH!
