Simulated Live Session Features

- These are sessions with a pre-recorded video that appears like a live stream to attendees
- Attendees are not able to pause, fast forward or rewind the video
- Engagement features include:
 - Session check-in and live text chat
 - Note taking
 - Q & A
 - Downloads
 - Polls
- **If applicable to the session**, Presenters/Speakers are able to go live on camera after the session ends, and answer attendee submitted Q & A
- Simulated live videos automatically become available for replay

Simulated Live Sessions - Before

< **THE NEW STACK MAKERS VIRTUAL PANCAKE BREAKFAST + PODCAST: IT, DEVELOPER STRATEGIES, AND OPEN SOURCE** ★ Save

This session has not yet started - Come back after the start time for all features.

Session details Speakers

🕒 FRIDAY, MAY 07
09:00 Europe/Paris - 09:35 Europe/Paris

It's pancake time! How do you manage your pancake stack? That's the question. Well, it has nothing to do with modern applications but those pancakes sure taste good! So what about that app data management? The needs are outpacing the reach of today's DevSecOps digital transformation plans. Join us for a short stack with The New Stack and the CNCF for this Pancake & Podcast discussion with **sponsor Dell Technologies** to talk about how DevOps, AppSec and IT teams can best use open source projects and enterprise management tools to enable developers to be free from the overhead of IT demands and keep data secure.

We'll look at persistent data and the role developers play with IT now that Kubernetes has emerged as the orchestration engine for at-scale architectures and microservices are taking center stage. Bring your questions for a chance to win a custom TNS spatula!

Speakers

 **Cheryl Hung**
Cloud Native Computing Foundation >

- Session page view **prior to 30 minutes** of the session
- Attendees are able to view the session details
 - Start date/time and end date/time
 - Description
- Attendees are able to view the session speakers
