Real-World Evidence Conference

October 25-26 | Virtual | #RWE21

As you know, the use of real-world data (RWD) and real-world evidence (RWE) in healthcare decision-making continues to evolve and mature, and that is especially true in the biopharmaceutical and medical device development arena.

Here are a few of the exciting session topics that will be covered at this year's meeting:

A discussion with the regulators: How are the major regulators thinking about the use of RWE in regulatory decision-making?

Feeling like you just can't keep pace with all of the RWE policy efforts? Get an update from the major cross industry consortia who are working on RWE initiatives.

Can high-quality, fit-for-purpose RWE also support access and reimbursement?

The Future of RWE: emerging trends and opportunities that can benefit patients.
