

## COMFORT IS RAISED TO A NEW LEVEL

With 23 event rooms of varying size, the **Bethesda North Marriott Hotel and Conference Center** can offer the space to fit your event and the flexibility to achieve your goals.

With our new HVAC purification system, we are creating a more comfortable environment.

Throughout the Conference Center and all public space in the hotel, including, our restaurant, lobby, MClub, fitness center and guest room corridors, the units circulate and clean the air (3) times per hour killing 99.4% of viruses and bacteria. Elements regarding these units and their effectiveness include:

- Produces positive and negative charged ions that attract particulate matter in the airstream including bacteria and viruses.
- Third party independent lab tested and certified to deactivate COVID as well as Noro Virus, STAPH, MRSA, E. Coli, Legionella and Mold Spores.
- Efficacy – Time dependent up to 99.4% in 30 minutes.
- The ions are produced in the air handling unit and distributed into spaces, so they attract particulate matter in the airstream as well as on surfaces such as desks, tables and counters.
